Projects

Ecommerce App

Key Features:

1. **Product Listings:** Displaying a wide range of products with images, descriptions, prices, and availability.
2. **Search and Filters:** Enabling users to easily find specific products using search functionality and various filters (e.g., price range, category, brand).
3. **Shopping Cart:** Allowing users to add products to their virtual shopping cart before proceeding to checkout.
4. **Checkout and Payment:** Facilitating a secure payment process where users can enter their payment information and complete the purchase.
5. **User Accounts:** Giving users the option to create accounts to track order history, manage addresses, and receive personalized recommendations.
6. **Reviews and Ratings:**

Tour Management

Using linked lists data structure, developed a program in C that provides a facility to organize lists containing name of individual/group leader, number of tourists in the group, for a specified date and for a specified destination

Weather App Using API

Fetching the real-time weather data from a weather API and display it on the Users Screen
